conemis – Automated Software Transition

With conemis transition cloud we are a leading provider of cloud software for automating transition to modern business applications in the cloud. We are supplying automation for the digitization of the global 2000 and mid-size enterprises.

conemis offers you an inspiring atmosphere in a select and dedicated team that allows you to apply your individual skills to automate transition with a global impact.

As a software engineer, are you interested in working on topics such as cloud computing, analytics, visualization and expansion of automation? Would you like to help further develop our innovative Java solutions for data migration and application modernization with the focus on GUI (GWT, Vue) or backend (JPA, SOAP, REST) and to shape future developments in the area of artificial intelligence, machine learning and robotic process automation?

Join the conemis team and enjoy the multi-cultural environment and benefits that come from working at a truly innovative and dynamic company.

What we offer

- interesting and varied tasks
- room for your own development
- a team of helpful, highly motivated and innovative colleagues
- constructive, challenging, and creative work atmosphere
- quiet place of work

What we expect

- systemic and constructive thinking and acting
- extensive work experience in software engineering in Java (EE)
- experiences with distributed systems, web services, and optimally Microservices
- knowledge in agile software development and test driven development (Scrum, TDD)
- preferable: knowledge in JPA (Hibernate), SOAP, REST, JDBC, GWT or Vue.js
- structured and goal-oriented way of working, willingness to take responsibility
- high degree of professional and social competence together with a sense of responsibility
- team player
- good written and spoken communication skills in German and English

Your application

Do you feel at home around words like clean code, design patterns, effective java or site reliability engineering? Then become part of our product development team and send your complete application (cover letter, resume, certificates) to jobs@conemis.com.
